## 1.2.1 Photodiode Energy Sensors

## 10pJ to 15μJ

## **Features**

- Silicon detectors
- Very sensitive down to 10pJ
- Repetition rates to 20kHz
- Wide spectral range

| Model  | PD10-C (b)                     |       |                             |                 | PD10-pJ-C (b)                    |            |                             |       |

| Compliance   | CE, UKCA, China RoHS           |       |                             |                 | CE, UKCA, China RoHS             |            |                             |       |
| Version  |                                |       |                             |                 |                                  |            |                             |       |
| Part number: Standard Sensor   | 7Z02944 (1.5m cable)           |       |                             |                 | 7Z02945                          |            |                             |       |
| Sensor with different cable length   | 7Z02944C (10m cable)           |       |                             |                 |                                  |            |                             |       |
| Note: (a) This is basic calibration accuracy. In certain wavelength regions calibration there is additional error as tabulated here. | <pre>&lt;250nm</pre>           |       |                             |                 | <250nm add ±2%<br>>950nm add ±2% |            |                             |       |

as tabulated here.

Note: (b) The PD10-C & PD10-pJ-C sensors are not under ISO/IEC 17025:2017 accreditation.

Note: (c) With the "user threshold" setting set to minimum. For other settings, the spec is for >10% of full scale or greater than twice the "user threshold", whichever is greater. The user threshold is not available with LaserStar, Nova, Pulsar, USBI and Quasar. For these meters, the threshold is set to minimum and the linearity spec is >10% of full scale. The PD-C series will only operate with Nova meter with an additional adapter Ophir P/N 7208272 (see page 141). The adapter can introduce up to 1% additional measurement error. The user threshold justement of the internal threshold up to 25% of full scale if desired to avoid false triggering in noisy environments.

For further information, see the FAQs on our Website.

Note: (d) With the LaserStar, Pulsar, USBI, Quasar and Nova with adapter, the pulse width settings are displayed as follows: 10µs (for 2µs setting) and 20µs (for 5µs setting).

Note: (e) For energies up to 2µJ

Note: (f) Additional Error with Frequency of ±1% only for energy scales up to 2µJ. For higher energies ±1% up to 5kHz, -6% at 10kHz.

Note: (g) For energies up to 20nJ

Note: (h) Additional Error with Frequency of  $\pm 1\%$  only for energy scales up to 20nJ. For higher energies  $\pm 1\%$  up to 5kHz, -6% at 10kHz.

## PD10-C / PD10-pJ-C
